The Munich Designer, AlineRiemerschmid, loves extraordinary accessories that are not only beautiful but also practical. Out of her passion for accessories and the desire to create individual pieces "Made in Germany", she decided to found her own accessory label *Etosha* in 2007 after a diploma in clothing technology and several years of freelancing work experience for well-known brands such as forEscada and Bogner for instance.

Unique design and haptic

The handmade handbag collection by *Etosha* offers classical and extravagant design for women and men. With a devotion for soft leather like lamb nappa, the *Etosha* creates uniquehandbags with sensuous haptic.

"Colors, above all, are kept discreet like earth, stone, black and slate and can be found in combination with bright red, yellow, petrol and blue accents. These distinctive color combinations and its animal prints foster stylish sophistication", says Aline. Moreover, the designer enjoys creative experiments with diverse leather types such as ostrich leg, nil tlapia or sea snake.

Leather handbags and accessories made in Germany

Beside the handbags, *Etosha* includes other exclusive accessories in its collection portfolio. Extravagant hip and waistbelts, original bracelets and delightful key followers are as essential as colorful hand tops, charming neckline flatterers and leather cloths offered by the accessory label. *Etosha* dedicates even a wonderful special line to the subject of "Trachten" (gerbs), a German costume tradition. For its stylish creations, most certainly the handbags, all materials are selected carefully and processed by high quality standards - All Made in Germany.

"*Etosha* are unique bags for stylish individualists. Clear and modern in its design, the bag collection offers elegant as well as careless unique specimens for fashionistas and fashion fans with sense for excellent quality" Aline adds.

Last but not least, Aline reveals that during a trip through Namibia and South Africa, the ideas for an own label crossed her mind and began to grow. She fell in love with the width and peace in the "Etosha frying pan" what eventually became the name for her original accessory label.
